

Thomas Birner  
Department of Physics, University of Toronto  
thomas@atmosp.physics.utoronto.ca

Resume: MSc in Physics (12/1999, U of Leipzig, Germany), PhD in Meteorology (12/2003, U of Munich, Germany), PostDoc at U of Reading, UK (11/2003-08/2004), PostDoc at U of Toronto (since 09/2004, Supervisor: Norm McFarlane)

Research Interests: global tropopause dynamics, e.g. interaction between convection, convectively coupled waves and the Brewer-Dobson circulation around the tropical tropopause; observational and modelling studies

Why interested: learn more about (especially) the fundamental theoretical multiscale aspects of tropical convection, get ideas for own research
